ReSound GN

Assistive Listening Devices

We are excited to have invested in a new range of hearing aids for our patients in partnership with GN ReSound.

The ReSound UP series has an UPgraded processing chip for significantly clearer hearing and longer-lasting batteries whilst also being smaller than the previous generation of hearing aids. For patients with more severe to profound hearing loss we have introduced the excellent C91, one of the most advanced Super Power hearing aids available.

New NICE guidelines recommend that patients have hearing aids compatible with wireless 'streaming' devices to further enhance hearing clarity in difficult situations. All of our new hearing aids have a wireless chip inside that allows the hearing aids to connect to the ReSound Unite streaming accessories including:

Micro Mic £180

Use

- In a restaurant, worn on the lapel by the communication partner
- When driving, either for driver or passenger
- In places of worship, placed at the lectern

Benefit

- Hear your communication partner clearly in a noisy room
- Understand speech easily without facing each other
- Overcome distance problems, hear over 25 metres with a clear line of sight

Multi Mic £250

Use

- In a restaurant, worn on the lapel by the communication partner
- When driving, either for driver or passenger
- In places of worship, placed at the lectern
- In meetings or groups around a table
- Hearing on the loop system
- Streaming your music directly to your hearing aids

Benefit

- Hear communication partner clearly in background noise
- Understand speech easily without facing each other
- Overcome distance problems, hear over 25 metres with a clear line of sight
- Hear more easily at a dinner party or important meetings
- Hear clearly at the theatre or places of worship
- Turn your hearing aids into customised headphones

TV Streamer 2 £220

Use

- Wirelessly stream the audio signal from your TV to your hearing aid
- Hear music from your stereo from over 7 metres away without any wires

Benefit

- Follow the TV much more clearly whilst still being able to enjoy a conversation
- Move around whilst watching TV
- Keep track of other sounds in the house such as the doorbell

Remote Control 2 £150

Use

- Discreetly control your hearing aids anywhere
- Adjust volume levels independently on left and right side
- One touch activation of your TV Streamer

Benefit

- Excellent for people with poor dexterity
- Clear information on screen to know which program you're using
- Silence your hearing aids at the touch of a button

PhoneClip + £180

Use

- Clearly stream phone calls direct to your hearing aids
- Use as a basic remote control with volume adjustment, mute and program change access
- Stream music and tinnitus therapy sounds directly from your mobile phone
- Use the Resound Control application on your mobile phone for full remote control functions

Benefit

- Enjoy effortless conversations wherever you are
- Switch easily between a phone call and your TV Streamer from the comfort of your chair
- Use the installed microphone to have hands-free conversations while driving

ReSound Unite accessories pair to your hearing aids in seconds and can be bought directly online and linked to the hearing aid easily in the home. These can help you hear the television, in a noisy room or even link your hearing aids to your mobile phone for clearer calls. These devices are not available on the NHS but can be purchased separately. Ask your Audiologist for further details.
